Joining up Arabic letters – continued

So far, we have learned how to write the Arabic letters when they are not joined together. However, Arabic words are usually written in a joined-up form. Most letters of the Arabic alphabet can be joined on either side. The shape of each letter changes according to its position within a word. These different forms must be learnt so that one can recognise the letters when they are combined together to make words.

Each letter has four forms: beginning, middle, end and by itself. On the previous two pages you will find a table showing how each letter is written according to its position in a word.

The 'Naughty' Letters

There are six 'naughty' letters which refuse to join on to any letter after them (in other words, to the left of them). However, they do allow other normal letters to join them from the right. The 'naughty' letters are:

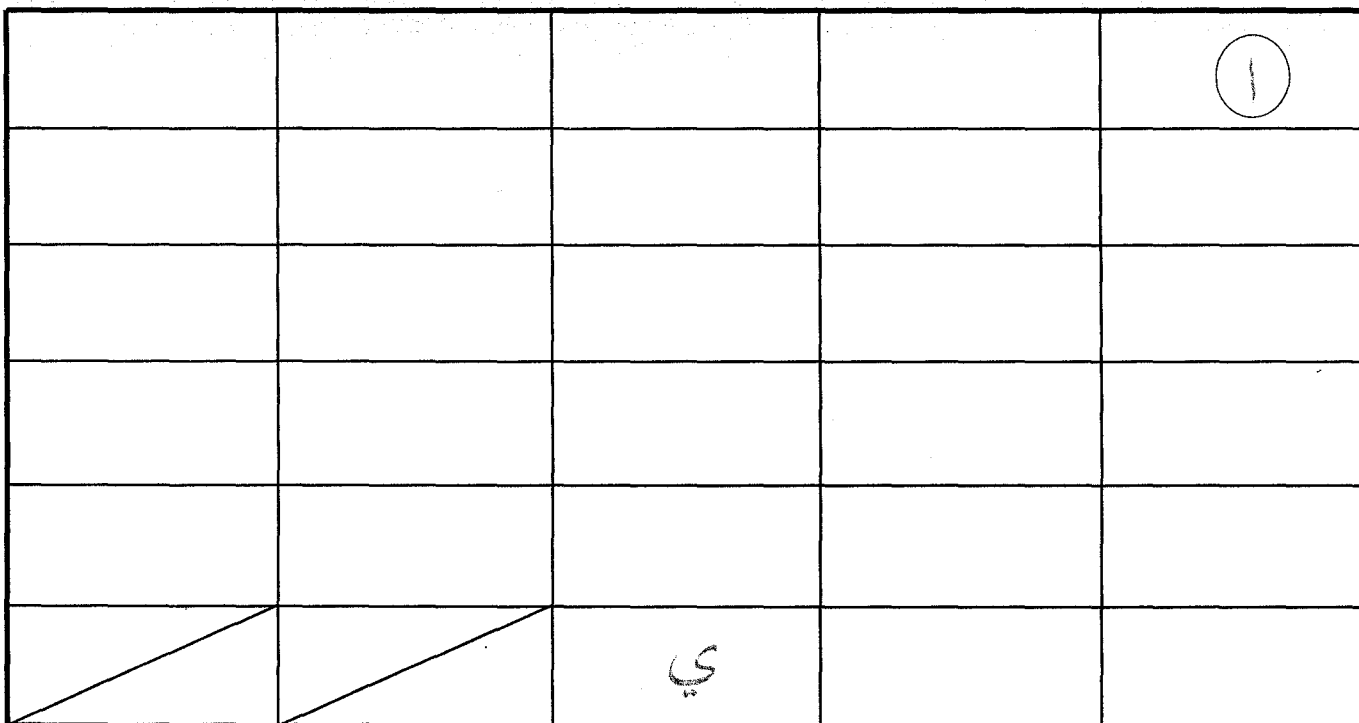

ا د ذ ر ز و

A normal letter written after a naughty letter cannot take the middle form. It will take the beginning form instead, unless it is the last letter of a word, in which case it will take the 'by itself' form.

Exercise

Write out the Arabic alphabet in the boxes below, and draw a circle around the six 'naughty' letters.
